

So what makes Polkadot suited for DeFi?

- 1. Fast and predictable block time**
- 2. Provable finalization**
- 3. Shared security**
- 4. Scalability**
- 5. Guaranteed message-passing across chains (allows composability)**
- 6. Heterogenous sharding means blockchains can be customized for DeFi applications**

Example 1: Token Teleporting

Example 2: **Statemint / Statemine** **(Asset-Specific Parachain)**

Example 3: Parachain Crowdlends

Example 4: **Acala / Karura**

Example 5: **Moonbeam / Moonriver**

Example 6: **RMRK: NFTs as DeFi?**

Example 6: **Astar / Shiden**

Example 7: Zeitgeist
